

Know When to Test Your Plan Table Top Exercise: Power Outage Scenario

It is a hot, rainy Friday morning. The current time is 11:30 AM. Suddenly, the lights go out and all of the computers, printers, and copiers turn off. For a few seconds, there is silence before the chatter begins to pick up. One of your emergency lights comes on, but the rest are not working. While many of the offices have windows to provide minimal light, the majority of the hallways and interior rooms are left in the dark.

1. Take the first 10 minutes to discuss what you will do next.

It is now 1:00 PM and the lights still are not on. The building HVAC has been off now for 1 ½ hours and the temperature inside the building is gradually becoming unbearable. Your entire power grid is without power. There is no word from the electric company about restoration of power.

2. Now what are you going to do?
3. Is your technology/computer room being dealt with? By whom?
4. Has someone turned off all computers, printers, and equipment to prevent electrical surge when power is restored?
5. Is your phone system down? How are you going to manage the phone lines?

It is now 2:00 PM. Employees are asking if they can leave early. The word around town is that the power might not be restored for several days.

6. How will you communicate this message? What instructions will you convey to your employees? Customers? Vendors?
7. Are you going to declare a disaster in order to activate your business continuity plan?
8. Continue your discussion with the following questions:
9. How are people within the organization communicating with each other (e.g., sending and receiving messages, information, and response details)? How are they communicating with other stakeholders (e.g., your customers and clients, the media)?
10. Is there a pre-determined and agreed upon central meeting place for company leaders, management, and employees?
11. Is there a copy of your business continuity plan that you can easily retrieve?
12. Are there any business processes for which there are manual workarounds? If so, discuss how that would happen.
13. How would you find an appropriate place to operate from for the remainder of the day? For the next one or two weeks, if necessary?
14. Have you begun an assessment that includes an evaluation of the status of employees, customers, operations, and external utilities?
15. How would you ensure that customer concerns are managed?
16. Have you begun to determine how much data was lost and how that will affect your operations?
17. Some employees are asking, "How will I know if I should come to work Monday?"
